

CUMULATIVE INDEX 1993

Volume 37

January	TOPICS IN ORAL DIAGNOSIS II, pages 1-162
April	INTERDISCIPLINARY PERIODONTAL SURGERY, pages 163-300
July	RESTORATIVE DENTISTRY, pages 301-530
October	ADVANCES IN DENTAL IMAGING, pages 531-713

Note: Page numbers of issue and article titles are in **boldface** type

- Abfraction, definition of, 349
- Abutment, selection and placement of, for implant-supported single-tooth restoration, 503
- Accuracy, photometric, of charge-coupled device, 536
- Acoustic neuroma, magnetic resonance imaging of, 605
- Adenoid cystic carcinoma, of head and neck, magnetic resonance imaging of, 607
- Adenoiditis, magnetic resonance imaging of, 600-601
- Adhesion, application of, with restorative materials, **329-340**
 - oral environment and, 329-330
- Adhesives, for dentin bonding, 332
- Aerosol filtration, with face masks, 303-304
- Ageusia, evaluation of, 39-40
- Aging, and taste disorders, 42
- AIDS adenopathy, magnetic resonance imaging of, 599
- Alveolar bone, evaluation of, in surgical crown lengthening, 168
- Alveolar implants, for alveolar ridge defect prevention, management of, 266-267
 - site coverage of, 267-268
- Alveolar ridge defects, interpositional graft procedures for, 277
 - localized, treatment of, **265-280**
 - onlay graft procedures for, 277-278
 - prevention of, 265-271
- Amalgam, **419-431**
 - as core material for crown, 387
 - basic reaction in, 420
 - clinical technique for, 427-429
 - composite resin veneer of, 427-429
 - for coronal caries, in special needs patients, 488
 - for root caries, advantages and disadvantages of, 492
 - glass ionomer vs, 336
 - history of, 419-421
 - material for, 419-423
 - projections of, pins/dowels vs, in posterior teeth, 386
 - restorations of, replacements of, reasons for, 422
 - retention of, 424-426
 - safety of, 423-424
 - uses of, 424-427
- Amalgapins, for amalgam retention, 426
- Ameloblastoma, of maxillary sinus, computed tomography of, 579
- Analgesics, clinical implications in dental patients, 83-84
- Angiotensin-converting enzyme inhibitors, clinical implications in dental patients, 75-76
- Antemortem records, in dental identification of dead, 142-143
- Anterior dentition, bridge correction of, 393
 - restoration in, armamentarium for, 399
 - bleaching for, 395-397
 - cosmetic recontouring for, 398
 - direct composite bonding for, 398-405
 - esthetics in, **391-409**
 - material choice for, 392
 - microabrasion for, 397-398
 - treatment methods in, 394-407
 - treatment planning in, 393-394
 - veneer placement for, 402

- Anticoagulants, oral, clinical implications in dental patients, 79-80
- Anticonvulsants, clinical implications in dental patients, 89-90
- Antidepressants, clinical implications in dental patients, 89
- Antifungal agents, clinical implications in dental patients, 86
- Antimicrobial agents, clinical implications in dental patients, 84-86
- Anxiolytic agents, clinical implications in dental patients, 86-87
- Aphthous ulcer(s), laser for, 288
 - oral, in HIV infection, 28
- Apically positioned flap, for maxillary impacted teeth, 184-187
- Area array, in charge-coupled devices, schematic drawing of, 105
- Argon laser, for dentistry, 285-286
- Arthrotomography, of temporomandibular joint complex, 572
- Articular disc, displacement of, scintigraphy of, 637
- Asymmetry, surgical crown lengthening for, 173
- Back projection, in computed tomography, definition of, 583
- Bacteria, dental infectious hazard with, 4
- Bacterial lesions, oral, in HIV infection, 22-23
- Balanced occlusion, definition of, 345
- Battered child syndrome, forensic dentistry in, 136
- Bayesian reasoning, for CMD systems, 116-118
- Benzodiazepines, clinical implications in dental patients, 87
 - for burning mouth syndrome, 59-60
- Beta-adrenergic antagonists, clinical implications in dental patients, 76-77
- Biocompatibility, with posterior restorations, 437-438
- Biopsy, laser for, 288, 292
- Bite mark analysis, comparison with tools in, 149-150
 - degree of certainty in, 150-151
 - evidence preparation in, 150
 - forensic dentistry in, 133-134, 145-151
 - history of, 135-136
 - in child abuse, 151-152
 - photographic evidence in, 147-148
 - preserving evidence in, 146-147
 - tissue specimens in, 149
- Bleaching, in anterior dentition restoration, 395-397
 - contraindications to, 395-396
 - home treatment with, 396-397
 - indications for, 395
- Body, examination of, in dental identification, 137-139
- Bonding, pins/dowels vs, in posterior teeth, 386-387
 - restoration with, finishing of, 404-405
- Bone grafting, in restorative dentistry, periodontal considerations in, 462
- Bone lesions, recognition of, with digital subtraction radiography, 94
- Bridge, anterior, debonding of, 447
 - fractured solder point of, 362-363
 - permanent, gingival recession with, sub-epithelial connective tissue grafts for, 262
- Bronchodilators, clinical implications in dental patients, 87
- Buccolingual defects, subepithelial/subconnective grafts and implants for, 275
- Buccolingual width, for implants, occlusal film of, 646
- Build-up, definition of, 367
- Burning mouth syndrome, 55-63
 - definition of, 55
 - differential diagnosis of, 59-62
 - evaluation of, 55-56
 - management of, 62
 - physical findings in, 57-59
 - prevalence of, 55
 - remission rate of, 55
- CAD/CAM, in restorative dentistry, 513-517
 - clinical results with, 514-516
 - future of, 517
 - limitations of, 516-517
 - restoration creation with, 514
- Calcium channel antagonists, clinical implications in dental patients, 76-77
- Cancer, and taste disorders, 51
- Candidiasis, in HIV infection, 22-23
- Canines, palatally impacted, management of, 192, 194
- Carcinoma, of head and neck, magnetic resonance imaging of, 606-607
- Cardiac glycosides, clinical implications in dental patients, 75
- Cardiovascular drugs, clinical implications in dental patients, 75-80
- CAREOP, for CMD systems, 119-120
- Caries, postsurgical control of, in periodontal treatment, 461-462
 - prevention of, in special needs patients, 493
 - recurrent, and restoration fracture, 359

- removal of, lasers for, 517
- Case management, CMD systems for, 114
- Central nervous system, disorders of, and taste disorders, 47-48
- Centric relation, occlusion vs maximum intercuspation, 343-344
 - recording of, 343
 - significance in restorative dentistry, 342-344
- Cephalometric radiograph, computed, 550
 - digital, 548-549
- Cephalosporins, clinical implications in dental patients, 85
- Ceramic crown, fabrication of, for implant-supported single-tooth restoration, 507
- Ceramic inlays, occlusal adjustment of, 441
- Ceramic inserts, in composite resin, for posterior composites, 412
- Ceramic restorations, bonded, for mandibular premolars, 440
- Ceramometal crown, fabrication of, for implant-supported single-tooth restoration, 508
 - for coronal caries, in special needs patients, 492
- CeraOne abutment, for implant-supported single-tooth restoration, 502
- CEREC CAD/CAM system, in restorative dentistry, limitations of, 516-517
- Cervical abrasion, subepithelial connective tissue grafts with, 250, 254
- Chamfers, in resin-bonded prosthodontics, 449
- Charge-coupled device, camera for, for radiographic digitization, 686
 - for dental imaging, 532-539
 - advantages and disadvantages of, 537
 - area arrays for, 534
 - color images with DentaCam system, 539
 - current sensor of, 535
 - fiberoptically coupled, 535
 - image application of, 538-539
 - imaging properties and types of, 535-538
 - operation of, 534
 - paper image from, 537
 - schematic diagram of, 533
 - sensors for, 534
 - for implant planning, 651-653
- Charge-coupled devices, electronic imaging with, 102-110
 - image detector of, 104
 - image produced by, 106
 - imaging properties of, 107
 - imaging systems using, 106
 - principles of, 102-103
 - video display and image processing panel of, 104
- x-ray detectors for, advantages and disadvantages of, 108
- Chemical(s), toxic, and taste disorders, 49
- Chemical changes, in burning mouth syndrome, 58-59
- Chemical sense, common, 38-39
- Chemical sensitivity, potential for, with dental amalgam, 423
- Chemosensory system, anatomy and physiology of, in taste disorders, 34-39
- Child abuse, forensic dentistry in, 151-152
- Childhood malignancies, of head and neck, magnetic resonance imaging of, 610
- Civil litigation, forensic dentistry in, 152-153
- Cleft lip/palate, magnetic resonance imaging of, 598
- CMD systems, for oral diagnosis, 113-121
 - future of, 121
 - review of, 119-121
 - operational methods of, 116-119
 - origins of, 114
 - reasoning methods used in, 116-119
 - role in dentistry, 115-116
- CO₂ laser, for dentistry, 283-284
 - advantages of, 293-294
 - cut vs ablation modes of, 283
- Coagulation, laser for, 288
- Cobalt-chromium-molybdenum alloy, for pins and dowels, 369
- Cognitive processing, in image interpretation, 685
- Commercial cart, for dental imaging, 532
- Composite resin(s), as core material for crown, 387
 - curing of, lasers for, 518
 - direct bonding of, in anterior dentition restoration, 398-405
 - for coronal caries, in special needs patients, 488-489
 - for posterior restorations, inlay of, advantages of, 415
 - technique modifications with, 415-417
 - for root caries, advantages and disadvantages of, 492
 - interfacial staining with, 330
 - posterior, 411-418
 - projections into dentin, 332
 - universal, for restorations, 413-415
- Compromised teeth, in restorative dentistry, 349
- Computed radiography, development of, 545
 - digital, block diagram of, 547
 - in dentistry, advances in, 95-97
- Computed tomography, 575-590
 - advantages of, 576-580
 - multiple image acquisition planes, 577-578

- Computed tomography (*Continued*)
 radiographic contrast adjustment, 578-580
 soft-tissue imaging, 578
 superimposition of structures, 576-577
 artifacts with, 579
 attenuation matrix solutions for, 583
 calculations for, 584
 cost and radiation dose with, 578
 data collection in, 582
 definition of, 575
 density resolution in, 615-616
 dental pathology analysis with, 584
 equipment for, 580-584
 fan beam scanner for, 581
 first-generation scanner for, 581
 for facial fracture diagnosis, 586
 image formation with, 580-584
 image generation in, 614
 mathematical concept behind, 575
 metallic artifacts on, 665
 of implant sites, 654-656
 of maxillary sinus ameloblastoma, 579
 off-axis reconstructed two-dimensional images of, clinical applications of, 619-626
 high-resolution, 617-619
 production of, 614-616
 ordering of, 588
 panoramic, reconstructed three-dimensional volume images of, 623
 reconstruction techniques of, two-/three-dimensional, 613-626
 spatial resolution in, 615
 standard imaging planes in, 589
 three-dimensional reconstruction of, 587
 three-dimensional volume images in, clinical applications of, 619-626
 generation of, 614-615
 high-resolution, 617-619
 production of, 614-616
 reconstruction of, 616-617
 uses in dentistry, 584-589
 x-ray beam attenuation in, 583
 Computer applications, in oral diagnosis, 113-131
 Computer-assisted interpretation, in diagnosis, 683-696
 Computer simulations, for oral diagnosis
 teaching, cytology smear in, 127
 diagnosis trees in, 129
 intraoral examination in, 126
 management options in, 128
 medical history in, 125
 patient simulation in, 123-124, 130
 program components of, 122-123
 work station for, 123
 COMRADD, for CMD systems, 120
 Condyle, benign osteoblastoma of, computed tomography of, 633
 chronic subluxation of, computed tomography of, 589
 hyperplastic, scintigraphy of, 636
 Confidentiality, with teleradiology, 677-678
 Connective tissue grafts, for alveolar ridge defects, 276
 subepithelial, for gingival recession, 230-231, 243-263. See also *Subepithelial connective tissue grafts*.
 Contaminated waste, management of, in infection control, 324-326
 Contamination, definition of, 1-2
 Convenience, with teleradiology, 678
 Core, definition of, 367
 Corrosion, of pins and dowels, 369
 Cosmetic recontouring, in anterior dentition restoration, 398
 Cost, with teleradiology, 678
 Coverings, for environmental surface management, 323
 Creeping attachment, with free gingival grafts, 235
 Cross-sectional planes, image acquisition in, with computed tomography, 577-578
 Crown(s), build-up of, in posterior teeth, 387
 caries in, treatment planning considerations in, 487-492
 for implant-supported single-tooth restoration, cementation of, 509-510
 fabrication of, 506-508
 try-in of, 508-509
 full, for root caries restoration, advantages and disadvantages of, 492
 porcelain, for anterior esthetic restoration, 406-407
 Crown and bridge restorations, emergencies with, 361-363
 Crown lengthening, soft tissue, laser for, 288
 surgical, 163-179
 clinical evaluation and treatment sequencing in, 165-166
 contraindications to, 165
 for esthetics, 171-178
 clinical examination for, 173-174
 objectives in, 174-176
 procedures for, 176-178
 smile analysis for, 171-173
 indications for, 164-165
 orthodontic extrusion for, 171
 principles of, 167
 procedures in, 167-171
 tooth preparation for, 166
 treatment planning for, 164-166
 Cystic hygroma, head/neck, magnetic resonance imaging of, 603
 Cysts, head/neck, magnetic resonance imaging of, 598-599

- Cytology smear, in computer simulation for oral diagnosis teaching, 127
- Cytomegalovirus, oral, in HIV infection, 25
- Data acquisition, digital, in restorative dentistry, 519
- DDST, for CMD systems, 121
- Dead, dental identification of, 136-145
- Decision tree, diagnostic, 117
in computer simulation for oral diagnosis teaching, 129
- Dental amalgam, 419-431. See also *Amalgam*.
- Dental arch, size of, in patterned injury, 146
- Dental care, rising demand for, restorative considerations in, 484
- Dental disorders, and taste disorders, 52-53
- Dental identification, forensic dentistry in, 136-145
- Dental images, acquisition of, advances in, 672-673
transmission of, importance of, 671-672
- Dental imaging, advances in, 531-696
charge-coupled device for, 532-539
commercial cart for, 532
solid-state detectors for, 531-540
- Dental malpractice, forensic dentistry in, 152-153
- Dental operator, infectious hazards in, 4-5
- Dental patients, drugs taken by, clinical implications of, 73-90
- Dental remains, examination of, in dental identification of dead, 137-140
- Dental restoration, single-tooth, implant-supported, 497-511
- DentiCAD Miniature Contact Digitizer, for data acquisition, in restorative dentistry, 515
- Dentigerous cyst, maxillary, reconstructed three-dimensional volume image of, 621
- Dentin, bonding agents for, placement of, 333
resin-based, adhesion with, 331-335
bonding of, glass ionomer cement restoratives for, 335-337
conditioning of, for bonding, 334-335
damage to, during pin placement, 377
etching and sealing of, for anterior esthetic restoration, 401
laser modification of, 518
resin projections into, 332
sensitivity of, as restorative emergency, 355
- Dentistry, lasers in, 281-296
- restorative, interactions with periodontics, 457-463. See also under *Restorative dentistry*.
- role of CMD systems in, 115-116
- Denture(s), allergy to, in burning mouth syndrome, 61
emergencies with, 363-365
in-office repair of, 364
metal breakage on, 364-365
partial, bonded retainer for, 446
- Diabetes mellitus, and burning mouth syndrome, 61-62
- Diagnosis, computer-aided interpretation in, clinical application of, 693-694
future developments in, 694
decision tree for, 117
in computer simulation for oral diagnosis teaching, 129
expert systems for, structure of, 690
image interpretation in, shortcomings of, 685-686
image-processing algorithms for, 686, 688
interpretation process in, computer-assisted, 683-696
conventional, 684-686
structure of, 684
- Diagnostic imaging, in dentistry, advances in, 91-111
- Diagnostic techniques, high-technology, in restorative dentistry, 519-520
- Diastema(s), extensive, direct bonding of, 400
orthodontic closure of, root positioning in, 222
orthodontic relapse of, 215-223
factors in, 216
- Digital image, computer analysis of, 557
- Digital imaging, panoramic and extraoral, 541-551
- Digital radiography, in dentistry, advances in, 91-95
- Digital subtraction radiography, 553-565
- Digitization process, in radiography, 556-557
- Digitizer, definition of, 556
- Disinfectants, alkaline glutaraldehyde, choices of, 321
for environmental surface management, 323
- Disinfection, monitoring strips for, 322
- Dispersalloy, reaction of, 421
- Diuretics, clinical implications in dental patients, 77-78
- Dose, of infectious diseases, 8
relationship to virulence and resistance, 11-13
- Dowel(s), definition of, 367
in posterior teeth, 378-386
alternatives to, 386-387

Dowel(s) (*Continued*)

- amalgam projections vs, 386
- as retentive devices, 367-390
- bonding vs, 386-387
- cementation of, 385
- custom cast vs prefabricated, 384
- design of, 379
- diameter of, 380
- direct core vs cast core, 384-385
- failure of, 385-386
- indications for, 378-379
- length of, 379
- practical considerations in, 387-388
- preparation for, 380-384
- spiral paste filler for, 385
- materials for, 369-372
- systems of, prefabricated, 371
- Dowel-crown, splitting effect of, prevention of, 383
- Dressing, following flap surgery, for surgical crown lengthening, 170
- Drugs, prescription, most frequently prescribed, 75
 - taken by dental patients, clinical implications of, 73-90
- Dynamic range, of charge-coupled device, 536
- Dysgeusia, evaluation of, 40-41
 - medications associated with, 43-47
- Edentulous space, contours and soft-tissue quality of, in single-tooth implant-supported restoration, 498-499
- Edentulous zone, soft-tissue model of,
 - abutment replica in, 506
 - fixture replica in, 507
- Elderly, functional dental requirements in, 485
 - patient assessment in, 485-487
 - chief complaint, 486
 - clinical examination, 487
 - functional status, 486-487
 - medical and medication history, 486
 - sensory changes with age, 487
- Electrolyte modifiers, clinical implications in dental patients, 78-79
- Electronic imaging, in dentistry, with charge-coupled devices, 102-110
- Enamel, etching of, lasers for, 518
- veneers of, materials for, 400-401
- Endocrine agents, clinical implications in dental patients, 80-83
- Endocrine disorders, and taste disorders, 49-50
- Endodontic(s), digital subtraction radiography in, 563
- Endodontic post, definition of, 367

- Environmental surface, management of, in infection control, 322-324
- Esthesioneuroblastoma, of head and neck, magnetic resonance imaging of, 608-609
- Esthetics, in elderly, restorative considerations in, 485
 - in posterior restorations, 440-441
- Estrogens, clinical implications in dental patients, 81
- Extraoral imaging, camera for, typical system using, 108-109
 - digital, 541-551
- Extraoral radiography, 547-550
- Eye coverings, for personal protection, in infection control, 304-305
- Face masks, for personal protection, in infection control, 302-304
- Facial fractures, diagnosis of, computed tomography for, 586
 - Waters' view radiograph of, 576
- Failing teeth, management of, for alveolar ridge defect prevention, 265-271
- Filler particles, size of, in posterior composites, 412
 - in universal composite resins, 414
- Fingerprints, for identification of dead, drawbacks of, 137
- Fixation screw, for implant-supported single-tooth restoration, 504
- Flap/closed-eruption technique, for maxillary impacted teeth, 187-188
- Flap surgery, for surgical crown lengthening, 168, 177
 - osseous surgery with, 168-170
- Fluoride release, with glass ionomer restorations, 336
- Fluoroquinolones, clinical implications in dental patients, 86
- Fluorosis stain, microabrasion removal of, 398
- Forced extrusion, of fractured teeth, 471-473
 - clinical examination for, 471-472
 - treatment planning for, 472-473
- Forced intrusion, of hypererupted teeth, 475-477
- Forensic dentistry, 133-156
 - history of, 134-136
 - in identification of dead, outcomes in, 143-145
 - scope of, 133-134
- Fractured teeth, as restorative emergency, 356-358
- Fractures, facial, diagnosis of, computed tomography for, 586

- Free gingival grafts, 227-242
 alternatives to, 234
 anesthesia for, 235
 dimensions of, 237-238
 donor site for, 238
 dressing of, 239
 for gingival recession, 245-246
 undesirable outcome in, 247
 harvesting of, 238
 indications and contraindications for, 232-235
 palatal discomfort with, 240
 placement of, 236
 postoperative bleeding with, 240
 postoperative considerations in, 240-241
 stabilization of, 240
 suturing of, 239
 technique of, 235-239
 wound healing with, 241
- Frenectomy, for orthodontic diastema relapse, 217-221
 laser for, 288, 289
- Frenotomy, for orthodontic diastema relapse, 217-221
- Fungal lesions, oral, in HIV infection, 22-23
- Galvanic currents, in burning mouth syndrome, 61
- Gap dimensions, critical, in posterior restorations, 416
- Gastrointestinal disorders, and taste disorders, 50-51
- General Electric CT HiLight Advantage Scanner System, 580
- Gingiva, changes in, with tooth movement, 212
 free grafts of, 227-242. See also *Free gingival grafts*.
 health of, tissue adequacy for, 233
 inadequate, free gingival graft for, 234
 margins of, symmetry of, crown lengthening for, 174
 recession of, causes of, 233-234
 classification of, 229-230
 free gingival graft for, 245-246
 grafting procedures for, indications for, 244
 pedicle graft for, 245
 subepithelial connective tissue grafts for, 243-263. See also *Subepithelial connective tissue grafts*.
 isolated wide deep, 248-250
 maxillary multiple, 250-254
 with fixed prosthesis, 260-261
 regeneration of, for root coverage, 230, 232-233
- Gingival groove, development of, with orthodontic approximation, 213
- Gingival recontouring, periodontal considerations in, 462
- Gingivectomy, for impacted teeth, 202
 maxillary, 183-184
 for surgical crown lengthening, 168
 laser for, 288
- Gingivoplasty, for orthodontic diastema relapse, 219
 in extraction sites, for prevention of orthodontic relapse, 214-215
 laser for, 288, 290
- Glass inserts, in composite resin, for posterior restorations, 412
- Glass ionomer(s), cement liners of, 337
 cement restoratives of, for dentin bonding, 335-337
 for coronal caries, in special needs patients, 489
 for root caries, advantages and disadvantages of, 492
- Glomus jugulare tumor, magnetic resonance imaging of, 608
- Gloves, in infection control, 305-307
- Gold crowns, for coronal caries, in special needs patients, 491-492
- Gold inlays, for posterior restorations, 439, 442
- Gold restorations, for posterior teeth, partial veneer castings for, 442
 physical properties of, 434
- Gore-Tex membrane, for gingival augmentation, 269, 271
 for root coverage, 230, 232-233
- Granulation tissue, removal of, laser for, 292
- Group function occlusion, definition of, 345
- Guided tissue regeneration procedures, for alveolar ridge defect prevention, 268-271
 flap design and management in, 271-272
 technique for, 271-273
 wound healing in, 272-273
- Gutta-percha, removal of, Pessio reamer for, 384
- Haemophilus influenzae*, patient as asymptomatic carrier of, 15
- Hairy leukoplakia, oral, in HIV infection, 25-26
- Hand antiseptics, in infection control, 309-310
- Head/neck, magnetic resonance imaging of, 591-611
 benign tumors, 601-604

Head/neck (*Continued*)

- congenital disorders, 597
- cysts, 598-599
- infection, 599-601
- malignant tumors, 604-610
- normal anatomy in, 593-595
- techniques of, 591-593
- Head trauma, and taste disorders, 42-43
- Hemangiomas, of head and neck, magnetic resonance imaging of, 601-602
- Hematologic findings, in burning mouth syndrome, 57
- Hepatic disorders, and taste disorders, 50-51
- Hepatitis B virus, patient as asymptomatic carrier of, 15
- Herculite XR, as universal composite resin, 414-415
- Herpes simplex, oral, in HIV infection, 24
- Herpes zoster, oral, in HIV infection, 25
- Heuristic reasoning, for CMD systems, 118-119
- High-technology innovations, in restorative dentistry, 513-524
- Histamine-receptor antagonists, clinical implications in dental patients, 88-89
- HIV infection, oral manifestations of, 21-32
- Host defense, in infection, innate, 9-10
 - mechanisms of, properties interfering with, 7
- Human immunodeficiency virus, 21-32
- Hyperkeratotic lesions, removal of, laser for, 288
- Hypocycloidal tomography, of hyperplastic coronoid process, 630
 - of temporomandibular joint, 629
- Hypoglycemic agents, oral, clinical implications in dental patients, 82-83
- Hypolipoproteinemic agents, clinical implications in dental patients, 78-79
- Image(s), acquisition of, planes of, with computed tomography, 577-578
 - analysis of, computer-aided, 690-693
 - for computer-assisted interpretation, definition of, 689
 - digital processing of, 686-693
 - enhancement of, computerized, in restorative dentistry, 519-520
 - processing of, algorithms for, for diagnosis, 686, 688
 - for computer-assisted interpretation, definition of, 689
 - quality of, with teleradiology, 677
 - reconstruction of, for computer-assisted interpretation, definition of, 689
 - segmentation of, for computer-assisted interpretation, 688
- Immunity, acquired, in infection, 10-11
- Immunologic findings, in burning mouth syndrome, 57
- Impacted teeth, closed eruption technique for, 203
 - extraction of, 202
 - immobility of, 201
 - labially positioned, management of, 202-203
- mandibular second molar, 198-201
 - etiology and incidence of, 198-199
 - orthodontics for, postoperative, 199-201
 - preoperative, 199
 - surgery for, 199
- mandibular second premolar, 196-198
 - etiology and incidence of, 196
 - orthodontics for, postoperative, 198
 - preoperative, 196
 - surgery for, 196-198
- maxillary, labial and intra-alveolar, etiology and incidence of, 181-182
 - orthodontics for, postoperative, 188-190
 - preoperative, 182
 - surgery for, 182-188
 - apically positioned flap, 184-187
 - flap/closed-eruption technique, 187-188
 - gingivectomy, 183-184
- maxillary palatal, 191-196
 - etiology and incidence of, 191
 - orthodontics for, postoperative, 195-196
 - preoperative, 191-193
 - surgery for, 193-195
- surgical and orthodontic management of, 181-204
 - potential problems with, 201-203
- Implant(s), digital subtraction radiography of, 563
 - film distortion of, 663
 - imaging of, intraoral, electronic or CCD techniques for, 651-653
 - intratreatment evaluation of, 656-667
 - laser for, 292
 - planning of, reconstructed three-dimensional volume image of, 622-625
 - postinsertion periapical radiograph of, 663
 - postsurgical assessment of, 659-667
 - presurgical assessment of, 662
 - linear tomography of, 650
 - radiographic, 645-656
 - panoramic, 650
 - radiology of, 645-668
 - root form, RadioVisioGraphy image of, 663, 666

- sites of, computed tomographic assessment of, 654-656
 - panoramic view of, 649
 - tomography of, 571, 573
 - identification by, 655
 - techniques for, 653-654
- treatment planning for, computed tomography in, 588
- Implant-supported single-tooth restoration, 497-511
- Impression(s), in dental identification of dead, 141
 - techniques of, for implant-supported single-tooth restoration, 503-506
- Incisor(s), lateral, missing or peg,
 - orthodontic treatment of, 473-477
 - mandibular, avulsion of, 360
 - maxillary central, fracture of, 357
 - incisal edge chipping of, 358
 - overlap of, bonding for correction of, 403-404
- Indirect inlays/onlays, for coronal caries, in special needs patients, 489-490
- Infection, control of, during restorative procedures, 301-327
 - personal protection in, 302-311
 - eye coverings, 304-305
 - face masks, 302-304
 - gloves, 305-307
 - hand antiseptics, 309-310
 - uniforms, 307-308
 - vaccines, 310-311
 - post-treatment procedures, 311-326
 - contaminated waste management, 324-326
 - environmental surface management, 322-324
 - instrument cleaning, 311-316
 - instrument disinfection, 320-322
 - instrument sterilization, 316-320
 - management of, for alveolar ridge defect prevention, 265-271
- Infectious disease(s), agents of, types of, 2-6
 - basic principles of, in dental practice, 1-20
 - damage to body in, properties causing, 7-8
 - definition of, 2
 - determinants of, 6-13
 - dose, 8
 - resistance, 8-11
 - virulence, 6-8
 - development of, steps in, 13-18
 - establishment of, properties aiding, 6-7
 - host defense mechanisms in, properties interfering with, 7
 - terminology of, 1-2
 - vaccines available for, 12
- Inflammation, chronic, management of, for alveolar ridge defect prevention, 268
- Information, perceptual and cognitive filtering of, 686
- Infratemporal fossa, boundaries of, on magnetic resonance imaging, 595
- Instrument cleaning, in infection control, 311-316
 - no-touch, disinfectant solutions for, 316
 - operator-assisted vs, 313-314
 - products for, 315
- Instrument disinfection, in infection control, 320-322
- Instrument sterilization, in infection control, 316-320
- Intercuspation, maximum, occlusion vs, in centric relation, 343-344
- Interdental papillae, hyperplastic, laser for, 291
- Interdisciplinary periodontal surgery, 163-296
- Internal bevel excision, for esthetic surgical crown lengthening, 177
- Interocclusal height, in single-tooth implant-supported restoration, 498
- Interpositional graft procedures, for alveolar ridge defects, 277
- Intraoral examination, in computer simulation for oral diagnosis teaching, 126
- Intraoral imaging, camera for, potential applications of, 109
 - potential advantages of, 110
 - using charge-coupled devices, 103
- ISDN (Integrated Systems Digital Networks), for telecomputing, 674
- Iteration, in computed tomography, definition of, 583
- Jaws, examination of, in dental identification of dead, 140
- Kaposi's sarcoma, oral, in HIV infection, 27
- Lasers, for dentistry, 281-296
 - advantages of, 287
 - applications of, 294
 - component design of, 282
 - for oral soft-tissue use, 288-292
 - comparison of, 292-294
 - limitations of, 294
 - operation of, 282

Lasers (*Continued*)

- safety of, 287
- tissue reaction to, 286-287
- types of, 283-286
 - argon, 285-286
 - CO₂, 283-284
 - Nd:YAG, 284-285
- in restorative dentistry, 517-519
- Legal issues, in oral diagnosis, 133-156
- Lesion removal, laser for, 288
- Lesions, recognition of, with digital subtraction radiography, 94
- Leukoplakia, hairy, oral, in HIV infection, 25-26
- Life expectancy, increasing, restorative considerations in, 483-484
- Linear array detector, for charge-coupled devices, schematic drawing of, 105
- Linear tomographic unit, diagram of, 654
- Linear tomography, of temporomandibular joint, 628
- Lingual epithelium, cellular organization of, 36
- Lingual reductions, in resin-bonded prosthodontics, 448-449
- Litigation, civil, forensic dentistry in, 152-153
- Luting agent, wear rate of, in posterior restorations, 416
- Lymphangiomas, of head and neck, magnetic resonance imaging of, 601-602, 604
- Lymphoma, magnetic resonance imaging of, head and neck, 608-609
 - maxillary sinus, 610
- Mach effect, in image interpretation, 685
- Magnetic resonance imaging, contrast enhancement in, 592
 - in dentistry, advances in, 97-102
 - restorative, 519
 - metallic degradation in, 606
 - of head and neck, 591-611. See also *Head/neck*.
 - of temporomandibular joint disease, 595-597
 - preferred planes for, 593
 - principles of, 97, 99
- Malignancies, childhood, of head and neck, magnetic resonance imaging of, 610
- Malignant lesions, removal of, laser for, 288
- Malpractice, dental, forensic dentistry in, 152-153
- Management options, in computer simulation for oral diagnosis teaching, 128

- Mandible, buccal and lingual cortices of, occlusal film of, 646
 - coronal tomographic slice of, 659
 - cross section of, selected tomographic imaging of, 657
 - oblique tomographic views of, 660
 - panoramic view of, 648
 - partially edentulous, magnetic resonance images of, 98-99

 Root(s), apex of, location of, automated identification of, 691
 caries in, treatment planning considerations in, 492-493
 coverage of, free gingival grafts for, 227
 direction of, automated identification of, 691
 hypersensitivity of, periodontal considerations in, 462
 sensitivity of, with gingival recession, subepithelial connective tissue grafts for, 253
 Root canal obturation, for dowel placement, 380
 S/N ratio, high, of charge-coupled device, 536-538
 Saliva, role in taste, 38
 Salivary changes, in burning mouth syndrome, 57-58
 Salivary gland disease, in HIV infection, 29-30
 Schwannoma(s), magnetic resonance imaging of, fifth nerve, 605
 head and neck, 602-604
 Sensitivity, of dentin, as restorative emergency, 355
 Sexual assault, patterned injuries in, 146
 Sigmoid notches, superior displacement of, reconstructed three-dimensional volume image of, 620
 Silicate glasses, composite resin in, for posterior restorations, 413
 Silver-copper eutectic spheres, in amalgam formulation, 421
 Single-tooth restoration, implant-supported, 497-511
 implant placement considerations in, 499-502
 clinical evaluation, 500
 diagnostic wax-up, 501

- fixture position and angulation, 500-501
 - immediate implant, 501
 - radiologic evaluation, 499-500
 - preoperative evaluation for, 498-502
 - surgical guide stent for, 501-502
 - prosthetic phase of, 502-510
 - temporary, 504
 - Sinusitis, magnetic resonance imaging of, 599-600
 - Sleep, alterations in, in burning mouth syndrome, 56
 - Slices, in computed tomography, definition of, 582
 - Smear layer, retention of, with dentin bonding, 333
 - Smell, definition of, 39
 - Smile analysis, in surgical crown lengthening, 171-173
 - Socket, postextraction management of, for alveolar ridge defect prevention, 266
 - Soft-tissue excision, for esthetic surgical crown lengthening, 176-178
 - Soft-tissue imaging, with computed tomography, 578
 - Soft-tissue reduction, laser for, 288, 291
 - Solid-state detectors, imaging using, 531-540
 - Somatosensory changes, in burning mouth syndrome, 58
 - Special needs patients, restorative considerations for, 483-495
 - Splinting, in restorative dentistry, periodontal considerations in, 461
 - Squamous cell carcinoma, head/neck, magnetic resonance imaging of, 606-607
 - Stainless steel, for pins and dowels, 369
 - Staphylococcus aureus*, patient as asymptomatic carrier of, 15
 - Sterility, monitoring systems for, 320
 - Sterilizers, selection of, criteria for, 317 types of, 319
 - Streptococcus* species, patient as asymptomatic carrier of, 15
 - Structural integrity, with posterior restorations, 438-439
 - Structures, superimposition of, with computed tomography, 576-577
 - Subepithelial connective tissue grafts, for gingival recession, 243-263
 - failure of, 250
 - genesis of, 247
 - multiple maxillary, 250-254
 - root preparation for, 248
 - suturing of, 249-250
 - with ridge defect, 259-263
 - stabilization of, 258
 - surgical technique of, 254-258
 - donor site, 255-256
 - incisions for, 255-256
 - recipient site, graft application to, 256
 - preparation of, 255
- Subepithelial/subconnective grafts and implants, for alveolar ridge defect prevention, 275-277
 - Sublingual gland ducts, plugging of, magnetic resonance imaging of, 599
 - Subtraction, computerized digital imaging for, 556-558
 - Subtraction angiography, photographic, mandibular, 555
 - Subtraction radiography, advances in dentistry, 554-555
 - digital, 553-565
 - clinical application of, 561-563
 - contrast and brightness correction of, 559
 - detection of change by, 561-562
 - minimal lesion detection with, 560
 - quantitative, for three-dimensional information, 560-561
 - sensitivity and specificity of, 559
 - validation of, 558-561
 - history of, 554-555
 - image matching in, computer algorithms for, 557
 - photographic, limitations of, 555
 - video repositioning in, 558
 - Superimposition, of structures, with computed tomography, 576-577
 - Supracrestal fibrectomy, circumferential, for rotational orthodontic relapse, 207-211
- Taste, anatomy and physiology of, 35-38
 - complaints of, in burning mouth syndrome, 56
 - definition of, 39
 - disorders of, 33-55
 - chemosensory system in, 34-39
 - congenital, 49
 - differential diagnosis of, 41-53
 - evaluation of, 39-41
 - iatrogenic causes of, 43-47
 - loss, 39-40
 - management of, 53-54
 - medications associated with, 43-47
 - neurologic causes of, 47-48
 - nutritional disorders and, 53
 - oral-dental disorders and, 52-53
 - psychiatric disorders and, 48
 - radiation therapy and, 46-47
 - systemic conditions and, 49-51
 - xerostomia and, 51-52

Taste (*Continued*)

- receptor cells for, transduction mechanisms in, 37-38
- Technique sensitivity, in posterior restorations, 439-440
- Teeth, examination of, in dental identification of dead, 139
- Telecomputing, approaches to, 673-676
 - channels for, 673
 - dedicated and switched telephone lines for, 673-675
 - digitization of, 674
 - electronic mail with, 675-676
- Teleradiology, for dentistry, 669-681
 - future directions in, 676-678
 - historic perspective on, 670-671
- Temporomandibular joint, anatomy of, 596
 - benign osteoblastoma of, computed tomography of, 635
 - scintigraphy of, 636
- degenerative disease of, computed tomography of, 632
 - derangement of, cause of, 596-597
 - disease of, magnetic resonance imaging of, 595-597
 - disorders of, occlusion and, 344-345
 - dysfunctional, centric relation in, 342-343
- imaging of, 627-643
 - arthrography, 637-639
 - indications for, 637-639
 - limitations of, 639
 - technical considerations in, 637
 - computed tomography, 630-634
 - fibromatosis, 634
 - indications for, 631-633
 - lateral vs medial views, 631
 - limitations of, 633-634
 - osteomyelitis, 634
 - psoriatic arthritis, 633
 - rheumatoid arthritis, 632
 - technical considerations in, 630-631
 - magnetic resonance imaging, 100-101, 640-642
 - indications for, 640-641
 - limitations of, 641-642
 - technical considerations in, 640
 - objectives of, 627
 - scintigraphy, 634-637
 - indications for, 635
 - limitations of, 635-637
 - technical considerations in, 634-635
 - tomography, 568-570, 628-630
 - displaced disc, 639
 - double-contrast, 638
 - indications for, 629-630
 - limitations of, 630
 - technical considerations in, 628-629
 - reconstructed three-dimensional volume image of, deformation, 619
 - degenerative disease, 620
 - sagittal CT scan of, 587
- Temporomandibular joint complex, arthrotomography of, 572
- Tetracycline stains, porcelain veneers for, 406
- Thermal expansion, coefficient of, microleakage vs, 331
- Thornwaldt's cysts, magnetic resonance imaging of, 598
- Thyroglossal duct cysts, magnetic resonance imaging of, 599
- Thyroid preparations, clinical implications in dental patients, 82
- Tissue reaction, to lasers, 286-287
- Tissue specimens, in bite mark analysis, 149
- Titanium, for pins and dowels, 369
- Tomography, 567-574
 - basic technique principles of, 567-568
 - clinical applications of, 568-573
 - computed, 575-590. *See also Computed tomography.*
 - hypocycloidal, of implant sites, 571
 - linear method of, 568
 - pluridirectional, types of movement for, 569
 - submentovertical view with, 572
 - with contrast media, 570-571
- Tongue, epithelium of, cellular organization of, 36
- Tonsillitis, magnetic resonance imaging of, 600-601
- Tooth (teeth). *See also Incisor(s); Molar(s).*
 - anterior. *See Anterior dentition.*
 - compromised, in restorative dentistry, 349
 - contour of, in periodontal health, 460
 - fractured, as restorative emergency, 356-358
 - forced extrusion of, 471-473
 - hypererupted, forced intrusion of, 475-477
 - mandibular, root dimensions of, 382
 - tooth thickness of, 376
 - maxillary, root dimensions of, 381
 - tooth thickness of, 375
 - posterior. *See Posterior teeth.*
 - retention of, improvements in, restorative considerations in, 484
- Tooth extraction, alveolar ridge defect prevention in, 266, 269
- Tooth structure, preservation of, with posterior restorations, 437
- with resin-bonded prosthodontics, 450
- Trabecular bone pattern, computer-aided detection and quantification of, 692-693
- Transmission time, with teleradiology, 677

- Treatment recommendations, CMD systems for, 114
- Tricyclic antidepressants, for burning mouth syndrome, 59-60
- Trouble shooting, in restorative emergencies, 353-365
- Tumor(s), head/neck, magnetic resonance imaging of, benign, 601-604 malignant, 604-610 removal of, laser for, 293
- Ulcers, oral, in HIV infection, 27-28
- Ultrasonic cleaner, aluminum foil test of, 318
- Unicompositional alloy, for amalgam, reaction of, 421-422
- Uniforms, for personal protection, in infection control, 307-308
- Upper respiratory infection, and taste disorders, 43
- Uprighting spring, for molar uprighting, in restorative dentistry, 470-471
- Vaccines, diseases covered by, 12 for personal protection, in infection control, 310-311
- Vascular lesions, removal of, laser for, 292
- Veneers, indirect, for anterior esthetic restoration, 405-406
- Vestibuloplasty, laser for, 292
- Videocameras, for dental imaging, 533 intraoral, 107-110
- Viral lesions, oral, in HIV infection, 24-26
- Virulence, of infectious diseases, 6-8 relationship to dose and resistance, 11-13
- Viruses, dental infectious hazard with, 5
- Voxel, in computed tomography, definition of, 582
- Warts, oral, in HIV infection, 24
- Waste disposal, methods of, 324-326
- Waters' view radiograph, of facial fractures, 576
- Wear resistance, in posterior restorations, 411, 413, 416
- Window width/level, in computed tomography, 584
- Wire grids, for alveolar bone height determination, 652-653
- X-ray imaging, using charge-coupled devices, 103-107
- X-ray sensitivity, of charge-coupled device, 536
- Xerostomia, and taste disorders, 51-52
- Zinc, for taste disorders, 54
